This user testing exercise is for educational purposes only, and is being conducted as a course requirement for DECO3500/7350, a course about the design of human-centred social and/or mobile computing applications.

You will be asked to interact with a paper prototype, computer program or system, and/or to answer questions about your interaction. We are testing the design; we are not testing you in any way. The test will require no more than an hour of your time, and potentially less.

Consent is voluntary – you do not have to participate if you don't want to. If you do participate, you may withdraw your consent at any point, and all your data up to that point will be destroyed and not used.

All data collected is confidential and will be kept in a secure location, and your data will be indexed by a participant ID rather than by name.

If AV recordings are taken, they will be seen only by the students doing this particular project and possibly also by their course tutors and the course coordinator (Ms Lorna Macdonald).

All your data, including any recordings, will be erased/destroyed once class grades are released.

There is no reimbursement or payment for participation.
